

Fulton & Ogden, Chicago, IL

Location: Chicago, IL

Architect: ESG Architecture & Design

Scope: 133.4 Linear Feet , 14 Swing Doors , 4 Sliding Doors , 19 Fixed Panels

Fulton & Ogden at West End on Fulton is a 14-story life sciences-focused workplace designed to foster collaboration, wellness, and adaptability in the heart of Chicago's Fulton Market District. Created by ESG Architecture & Design and developed by Trammell Crow Company, the project combines sophistication and function to meet the evolving demands of modern office spaces. [PK30 Systems](#) played a key role in this transformation, providing high-performance glass partitions, [swing doors](#), [sliding doors](#), and [fixed panels](#) to enhance the workspace's flexibility and aesthetic appeal.

Challenge

The design of Fulton & Ogden aimed to balance openness and privacy while maintaining a sleek, contemporary look. The key challenges included:

- Maximizing natural light and openness while ensuring acoustic privacy
- Blending industrial heritage with a modern, refined aesthetic
- Providing adaptable, high-performance partitions for flexible workspace configurations
- Ensuring seamless installation and durability in a high-traffic commercial

environment

Solutions

[PK30 Systems](#) collaborated with ESG Architecture & Design to develop a custom partition solution that integrates style, flexibility, and performance. Our contributions included:

- 133.4 linear feet of PK30 glass wall systems, including swing doors, sliding doors, and fixed panels
- Acoustic glass technology to enhance privacy without compromising visibility
- Sleek black anodized aluminum frames for a modern, high-end aesthetic
- Precision-engineered components to ensure a flawless, streamlined installation

Results

The installation of [PK30 Systems](#) at Fulton & Ogden successfully delivered:

- Bright, open spaces with optimized natural light flow
- A refined, high-performance aesthetic that enhances the workspace experience
- Modular, flexible partitioning solutions that adapt to evolving tenant needs
- Efficient, precise installation, ensuring seamless execution

The result is a cutting-edge office environment that promotes creativity, collaboration, and well-being while aligning with the developer's vision for a modern life sciences hub.

Conclusion

The Fulton & Ogden project exemplifies [PK30 Systems](#) 's dedication to delivering flexible, high-performance partition solutions that enhance modern office environments. By seamlessly integrating design, durability, and functionality, PK30 helped create a sophisticated, adaptable workspace that sets a new standard for commercial architecture.
